## Commercial

... solar, safety and energy saving solutions

Whether you are a small business or billion-rand corporation, you do what it takes to reduce expenses and protect your bottom line. With Sun Stop Window Tint solar window film installed on your office you can save significantly on energy costs, maintain a more and productive environment, reduce interior fading and improve exterior appearance. Our window films start working for you the minute they installed to your glass offering you benefits beyond your needs year after year.

... architects and building engineers go green

Designing energy efficiency buildings and structures is the fastest growing trend in the construction industry.

Sun Stop Window Tint a wide range of window films to solve common building envelope issues, including hot spots, interior fading, and safety.

... going green

Sun Stop Window Tint have a net positive enviromental impact. Buildings are such a large source of carbon emissions, many building managers and home owners are concerned with reducing their carbon footprint. Our Commercial Window Films send the sun's heat away from your building, giving you and your company extensive savings on your air-conditioning cost.

## ... the facts :

### Solar Protection

... sun stop window tint blocks harmful rays while letting visible light through.

Practically invisible when installed onto glass, Stop Window Tint rejects high levels of heat - offering you strong protection against bothersome glare, uncomfortable hot spots and uneven temperature fluctuations. You'll feel an immediate difference upon installation.

### Fading

... sun stop window tint blocks harmful rays

The sun's ultra violet radiation, heat and light cause fading and deterioration of fabrics, carpets furnishings, storefront displays and other interior items. All Sun Stop Window Tint films reject up to 99 % of harmful ultraviolet radiation and varying amounts of heat and light. This dramatically reduce damage to your interiors and furnishings keeping them in like-new condition longer.

**... the facts :**

## **Safety**

**... sun stop window tint keep shattered glass intact and protect occupants**

Anything from a stray golf ball to a violent storm can send shards of glass flying, subjecting people and property to serious damage, injury or worse. Sun Stop Window Tint keep dangerous shards together on impact, whether due to accidents, severe weather, attempted break ins, or vandalism.

## **Energy Savings**

**... sun stop window tint solar films produce positive impact on the environment**

Sun Stop Window Tint solar protection films save up 30% on energy costs, which can reduce many buildings' carbon footprints. It can be installed quickly and professionally , allowing you begin realizing your energy saving goals without delay. Savings can be applied to offset initial costs, accelerating your return on investment. Long term savings and comfort go on for years.

## Decorative Tint

... stylish and cost effective

Sun Stop Window Tint Decorative Films have taken the market by storm. Interior designers, contractors and residential & commercial window installers are enthusiastically embracing these designs!

Decorative window film is ideally suited for applications that require day or night privacy without sacrificing the natural light levels in both commercial and residential applications. Commercial films are found in banks, restaurants, health clubs, hotel foyers, conference rooms, and are used as office partitioning. Commercial buildings are dramatically increasing the use of internal glass walls as partitioning which brings natural light into offices, creating greater work productivity, as well as the illusion of a more spacious room with privacy.

Films are installed using a water and soap based solution. Decorative window films are easily removed and replaced to the appearance at a later time. This, of course, is a great advantage as most landlords do not object to their tenants' installation of film when they find out the product can be removed.

## Decorative Tint

privacy

decorative

**Flexible Design** - Sun Stop Window Tint allows the customer to bring colour, visual effects and graphic patterns to glass surfaces in commercial and residential spaces or customize a space with a corporate logo or signage.

**Cost Effective** - Etched glass is an expensive option when compared with these aesthetically pleasing and versatile film treatments.

**Enhanced Privacy** - Decorative films allow light to pass through glass while protecting privacy in homes, offices, and commercial environments.

**Glare Reduction** - Decorative films reduce eye strain and help improve conditions for office employees and building tenants.

### Add Decorative Films to:

- Glass partitions to add privacy
- Retail displays
- Walkways
- Office doors \* conference rooms \* private spaces
- Bathrooms without blocking the light.
- Make glass surfaces clearly and beautifully visible
- To delineate passageways enhance safety in public spaces
- Add flexibility to displays
